NOTES

* This designation is without prejudice to positions on status, and is in line with UNSCR 1244/1999 and the ICJ Opinion on the Kosovo declaration of independence.

** This designation shall not be construed as recognition of a State of Palestine and is without prejudice to the individual positions of the Member States on this issue.

The grouping of non-EU countries and territories by continent is based on geographical criteria only and does not have any political implications. For this exercise, we have followed the ESTAT GEO (Geopolitical entities reporting) code list which provides geographical entities for statistical purposes at the aggregate-level of countries, regions and organisations.

PREFACE

People have moved – in pursuit of dreams for better lives or forced to by conflict or natural disasters – since time immemorial. Their journeys have been transformative, for themselves and for societies. Today, the movement of people, that has also demographic consequences, has become increasingly contentious and prone to manipulation through misinformation, ‘fake news’ and in certain political narratives.

European Commission President von der Leyen highlighted the need to strengthen further the culture of evidence-based policymaking and to make full use of the available knowledge, information and research. I am pleased to say that the Atlas of Migration 2019 makes a solid contribution to this objective.

The first Atlas of Migration, presented in 2018, collated and visualised harmonised and validated migration data for countries across the world in an easy to access format. This new 2019 edition of the Atlas goes even further with a significant expansion in countries covered on top of the EU Member States – from 44 in 2018 to now 170 in 2019. It offers further improved accessibility, notably via an interactive online reference tool which runs on a continuously updated data repository to show the latest available data. Users can edit the parameters to produce their own country profiles. Population statistics and demographic change indicators are included on the basis of latest available projections.

Charlina Vitcheva
Acting Director-General
Joint Research Centre
European Commission

The Atlas of Migration was developed by the European Commission's Knowledge Centre on Migration and Demography (KCMD), with data made available by the European Commission's Joint Research Centre, Eurostat and the Migration and Home Affairs Directorate-General. I am grateful also to other organisations which have contributed, notably the United Nations Department of Economic and Social Affairs, United Nations Development Programme, United Nations High Commissioner for Refugees, United Nations Office for the Coordination of Humanitarian Affairs, United Nations Relief and Works Agency, International Displacement Monitoring Centre, the Organisation for Economic Co-operation and Development, the World Bank and the Institute for Economics and Peace.

The collaboration within the Commission, as well as with the European External Action Service, was exemplary. Our colleagues' support was crucial in ensuring the relevance of the data for policy-making. The Atlas is thus a result of a truly cross-departmental collaborative approach.

I therefore fully encourage you to explore and use this Atlas of Migration. It is an excellent means by which policymakers, other stakeholders and citizens can be as well-informed as possible of the actual facts shaping migration today and tomorrow.

MIGRATION IN THE EUROPEAN UNION

INTRODUCTION

In early 2019, the European Commission's then-First Vice-President Timmermans stated 'Europe is no longer experiencing the migration crisis we lived in 2015'.¹ Rather than a crisis-mode of politics, the emphasis was placed on finding a longer-term, sustainable European approach to migration. The importance of moving beyond the crisis and making a 'fresh start' on migration has been further underlined by President von der Leyen in her Political Guidelines for 2019-2024. In these, she states that 'I am aware of how difficult and divisive discussions on this issue are. We need to allay the legitimate concerns of many and look at how we can overcome our differences. We need to look at it in a comprehensive way'.²

Migration to, from and within Europe has shaped social, political and economic development throughout history. This remains true today and will continue to be so in the future but the form that it takes will vary from place to place.

This section of the Atlas of Migration contains country profiles of the 28 EU Member States and contributes to having a clear overview of migration in the entire EU. It includes information on migration flows and the size of migrant populations, on asylum applications and outcomes, as well as residence permits and Schengen Visas. It also includes a range of indicators on integration, from naturalisation to social inclusion and participation in education and labour market. This data shows the size and scale of types of migration to Member States across the EU and provide an initial overview of the living conditions and dynamics of integration of migrants. In addition, there is a pull-out sheet covering the EU as a whole. 'How to Read' and 'Technical Notes', respectively at the beginning and at the end of the section, explain the single charts and provide notes and references to the original data sources.

In 2018, 22.5 million non-EU citizens were residing in Member States of the EU, and 17.6 million citizens of EU Member States resided in another country within the EU. At the same time, 92% of the EU population is a national of the Member State that they reside in. In 2018, 3.2 million people were given first residence permits to move to and reside in an EU Member State. Just a few years earlier, in 2014, it was 2.3 million. 588 000 people also made first applications for asylum in EU Member States in 2018, well above the levels of a decade earlier (153 000 first applications were made in 2008), but declining by more than half from the level of 2015 (1.3 million).

Yet there is a more varied picture beyond these general numbers. Over one third of first permits (36.5%) were granted by just two Member States in 2018, specifically Poland (635 000) and Germany (543 500). And across these there was also significant variation. For example, whereas 35% of first time permits in Germany were given for family reasons, in Poland only 2% were. Whereas in Poland 52% of first time permits were for remunerated activities, in Germany it was 13%. Patterns of integration also vary across all Member States, with diverse employment rates and levels of social inclusion from one country to another.

As the examples briefly mentioned here highlight, there is a need to be aware of differences across EU Member States in order to better understand migration and its implications for the EU. The country profiles on the following pages represent a first entry point to do so.

This section covers each of the 28 EU Member States (MS). The charts are organised in thematic parts. More detailed information is available in the Technical Notes at the end of this section.

The data refers to 2018. If the data for 2018 is not available from the original source, the corresponding field is either missing or indicated as 'N/A'. Whenever 2018 data is not available for an entire thematic part, the latest available values are provided.

Note that in some cases, the sum of percentages or of individual values might not add up to 100 or to the total value. This is due to rounding and confidence intervals.

OVERVIEW [at 1st January] (Eurostat)

Population - 2018 (in thousands)

The larger donut chart shows the number of people residing in the MS by broad group of citizenship. The groups are 'Nationals', 'EU Mobile', 'Non-EU' (which includes also 'Stateless' and 'Unknown'). The total population of the country is in the centre.

Annual flows - 2018 (in thousands)

The two smaller charts show the scale of migration to and from the MS. The top chart shows the number of people who have immigrated to the MS over the last year. 'Within EU' immigration refers to people who are citizens of other EU MSs. 'Outside EU' immigration refers to non-EU citizens. The bottom chart shows the number of people who have emigrated from the MS over the last year, moving to another MS ('within EU') or to a non-EU country/territory ('outside EU'). The total numbers of immigrants and emigrants are in the centre of each respective chart.

DEMOGRAPHY [at 1st January] (Eurostat)

Population pyramid - 2018 (in thousand)

The chart shows the demographic composition of population in the MS. It indicates the number of people by age group, sex (males and females) and broad group of citizenship (shown from the outside to the inside of the pyramid), specifically 'Nationals' (citizens of the MS), 'EU Mobile' (citizens of the other 27 MSs) and 'Non-EU' citizens (which includes also 'Stateless' and 'Unknown').

The original Eurostat data is organised in 5-year cohorts and has been aggregated to obtain 10-year cohorts. The data refers to the population as of 1st January.

RESIDENCE PERMITS (Eurostat)

First residence permits issued during the year

The top chart shows the number of people who have received a particular residence permit for the first time during a year, for the last four years (annual flow of resident permits). The reasons for issuing permits are 'Work', 'Family', 'Education' or 'Other' (which includes International protection).

Valid residence permits at the end of the year

The bottom chart shows the number of migrants residing in the MS with different types of residence permits and with permits that are valid for at least five years (national and EU long term residence permits). This signals the total number of permits held by people in the country at the end of the reference year (the migrant stock). The reasons for valid permits are the same listed above.

ASYLUM [1st Instance] (Eurostat)

First time applications

The chart shows the number of people who have made a first application for asylum in the MS during a year. The data covers the last years and is broken down by sex.

The total annual figure is shown on the right.

First instance decisions

The chart shows the distribution of decisions on first asylum applications in the MS by outcome:

- 'Geneva' for 'Geneva convention status';
- 'Subsid.' for 'Subsidiary protection';
- 'Human.' for 'Humanitarian protection';
- and 'Reject.' for 'Rejected application'.

The total decisions on first applications for asylum during a year is shown on the right.

SCHENGEN VISAS (HOME)

Visas applied for, issued and not issued (in thousands)

Each donut chart shows the percentage of Schengen visas issued and not issued per year. The number in the centre shows the total number of visas applied for during each year.

The figure refers to the sum of uniform visas (including MEVs), LTVs, and ATVs. For detailed description, see Technical Notes.

Note that for Romania, Bulgaria & Croatia the data on LTV visas is missing.

IRREGULAR MIGRATION (Eurostat)

Persons ordered to leave, persons returned and return rate

The bar shows the number of people who have been 'Ordered to leave' the country and the circle those 'Returned to a third country/territory' following an order to leave per year.

Return rate

The return rate on the right is calculated as the ratio between the number of people returned to a third country/territory following an order to leave and the people who received an order to leave. Since it is calculated on annual data, it might result higher than 100%, because of administrative backlogs.

NATURALISATION (Eurostat)**Foreign citizens who have acquired citizenship during the year**

Each of the pie charts, together with the relative number, shows how many people from other countries and territories have acquired the citizenship of the MS per year. The data is broken down into (a) people whose previous citizenship was from another MS ('EU Mobile') and (b) people whose previous citizenship was from a 'Non-EU' country/territory (including both 'Stateless' and 'Unknown').

Share of foreign citizens who have acquired citizenship [%]

The bar charts show the acquisition of citizenship over the last four years by people who are nationals of another country. The first bar ('EU') shows the proportion of all nationals from other EU MSs residing in this country who have acquired its citizenship during the calendar year. The second bar ('Non-EU') shows the proportion of all citizens from non-EU countries and territories residing in the country (including Stateless and Unknown) who have acquired its citizenship during the year.

SOCIAL INCLUSION - 2018 (Eurostat)

The three charts refer to different aspects of social inclusion of migrants in the MS during the year. Together, they highlight differences in the relative wealth and living standards of residents by broad group of citizenship: Nationals, EU Mobile and Non-EU.

Median equivalised net income (18+) shows differences in income levels for adults by broad group of citizenship. The values are in Euro.

Overcrowding rate (18+)(Households) shows the percentage of adults by broad group of citizenship who live in a household defined as 'overcrowded'.

Persons at risk of poverty or social exclusion (18+) shows the percentage of adults by broad group of citizenship who are either at risk of poverty, face serious material deprivation or live in a household defined as having a 'very low work intensity'.

At risk of poverty rate for children indicates the number of people under 18 (by citizenship of their parents: Nationals vs Non-Nationals) who are defined as being 'at risk of poverty'.

EDUCATION - 2018 (Eurostat)

The three charts show differences in educational attainment and participation in education by broad group of citizenship: Nationals, EU Mobile and Non-EU.

Population by educational attainment (25-64) refers to the proportion of people aged between 25 and 64 by their education level. 'LOW' refers to Less than primary, primary and lower secondary education; 'MEDIUM' refers to Upper secondary and post-secondary, non-tertiary, education, and 'HIGH' refers to Tertiary education.

NEET (18-24) shows the proportion of people aged between 18 and 24 who are 'Neither Employed nor in Education or Training' in the four weeks preceding the survey.

Early school leavers (18-24) shows the proportion of people aged between 18 and 24 which has completed no more than lower secondary education and is not involved in further education or training.

LABOUR MARKET - 2018 (Eurostat)

The charts present employment and unemployment related indicators by broad group of citizenship ('Nationals', 'EU Mobile' and 'Non-EU') and sex. The top three charts show also a breakdown by age group, whereas the bottom one by education attainment. This section can signal similarities and differences in integration of these subgroups in the labour market.

Employment rate shows the percentage of the total working-age population which is employed.

Unemployment rate indicates the percentage of unemployed people in the labour force. It is calculated as the ratio between the unemployed population and the sum of employed and unemployed population within the same group.

Long term unemployment rate refers to people who have been unemployed for more than one year. It is calculated as the proportion of the total unemployed population within each group which has been unemployed for more than one year.

Employment rate by educational attainment (15-64) shows employment rates by level of educational attainment. 'LOW' refers to Less than primary, primary and lower secondary education; 'MEDIUM' refers to Upper secondary and post-secondary, non-tertiary, education, and 'HIGH' refers to Tertiary education.

RESIDENCE PERMITS

Indicator: First residence permits (by reason)

Source of data: EUROSTAT - migr_resfirst

Description: First permits by reason, length of validity and citizenship.

Note: Any authorisation issued to a person for the first time by the authorities of a Member State allowing a third country national to stay legally on its territory. The dataset is disaggregated by the following groups of reasons: Remunerated activities (referred to as 'Work'), Family, Education and Other. The group 'Other' includes Refugee status and subsidiary protection; Humanitarian reasons; Residence only; Unaccompanied minors; Victims of trafficking in human beings; and Other reasons not specified. For further information, the reader can refer to the specific dataset from EUROSTAT (migr-resoth: 'First permits issued for other reasons by reason, length of validity and citizenship').

Indicator: Valid permits (stock) – Valid permits at the end of the year (by reason)

Source of data: EUROSTAT - migr_resvalid

Description: All valid permits by reason, length of validity and citizenship on 31 December of each year.

Note: The dataset includes the same four groups of reasons as the First residence permits dataset, as well as two additional groups: Refugee status and Subsidiary protection. For consistency in the data presentation, these two have been aggregated into the group 'Other'.

ASYLUM (1ST INSTANCE)

Indicator: First time applications

Source of data: EUROSTAT - migr_asyappctza

Description: Asylum and first time asylum applicants by citizenship, age and sex Annual aggregated data (rounded).

Note: First-time asylum applicants are people who lodged an application for asylum for the first time in a given Member State during the reference period. The term 'first-time' implies no time limitation and therefore a person can be recorded as first-time applicant only if he or she had never applied for international protection in the reporting country in the past, irrespective of whether they are found to have applied in another Member State of the European Union.

SCHENGEN VISAS

Indicator: Visas

Source of data: DG HOME – Schengen visa stats

Description: Complete statistics on short-stay visas issued by the Schengen States (2014-2017) and Bulgaria, Croatia and Romania (non-Schengen EU States).

Note: A Schengen visa is an authorisation issued by a Schengen State enabling someone to transit through or stay in their territory. Airport transit visas (ATV) entitle the holder to transit through the international transit area of airports situated on the territory of a Member State without actually entering the territory of that Member State, during a stop-over or transfer between two stages of an international flight. Short stay visas are: a) uniform short stay visas that entitle the holder to stay in the territories of all Member States for a period of maximum 90 days/180 days and that may be issued for the purpose of a single entry or multiple entries (MEVs); and b) short stay visas with limited territorial validity (LTV) that entitle the holder to stay only in the territory of the Member State(s) for which the visa is valid. Data on LTV visas is not available for Romania, Bulgaria & Croatia.

Indicator: Overcrowding rate (18+) [%]

Source of data: EUROSTAT - ilc_lvho15

Description: Overcrowding rate by age, sex and broad group of citizenship (total population aged 18 and over).

Note: The overcrowding rate is defined as the percentage of the population living in an overcrowded household. A person is considered as living in an overcrowded household if the household does not have at its disposal a minimum number of rooms equal to: one room for the household; one room per couple in the household; one room for each single person aged 18 or more; one room per pair of single people of the same gender between 12 and 17 years of age; one room for each single person between 12 and 17 years of age and not included in the previous category; one room per pair of children under 12 years of age.

Indicator: At risk-of-poverty for children [%]

Source of data: EUROSTAT - ilc_li33

Description: At-risk-of poverty rate for children by citizenship of their parents (population aged 0 to 17 years).

Note: The at-risk-of-poverty rate is the share of people with an equivalised disposable income (after social transfer) below the at-risk-of-poverty threshold, which is set at 60% of the national median equivalised disposable income after social transfers. This indicator does not measure wealth or poverty, but low income in comparison to other residents in that country, which does not necessarily imply a low standard of living.

Indicator: NEET [%]

Source of data: EUROSTAT - edat_lfse_23

Description: Young people neither in employment nor in education and training by sex, age and citizenship (NEET rates).

Note: The indicator corresponds to the percentage of the population of a given age group and sex which is neither employed nor involved in further education or training. This refers to persons meeting these two conditions: they are not employed (i.e. unemployed or inactive according to the International Labour Organisation definition); they have not received any education or training in the four weeks preceding the survey. The denominator is the total population of the same age group and sex, excluding the respondents who have not answered the question 'participation to regular education and training'.

A person is standing on a wooden pier or dock, looking out over the ocean at sunset. The person is wearing a grey sweater and dark pants, and is holding a large, dark suitcase with a patterned design. The sun is low on the horizon, creating a warm, golden glow over the water and the pier. The person's shadow is cast on the wooden planks of the pier.

MIGRATION IN NON-EU COUNTRIES AND TERRITORIES

INTRODUCTION

Globally, the number of international migrants is increasing. In 2019 there were an estimated 272 million international migrants worldwide, rising from 249 million in 2015. International migration is also increasing slightly faster than the growth of the world's population, but the total proportion of the world population which migrates remains generally low: international migrants represented 3.4% and 3.5% of the world's population respectively in 2015 and 2019.

Developments over recent years have emphasised the importance of taking a global approach to managing international migration. The *Global Compact for Safe, Orderly and Regular Migration* and *Global Compact on Refugees*, both adopted in 2018, set out how the international community has renewed its efforts to manage international migration and displacement around the world. At the EU level, the importance of having an international focus had been already expressed in the 2015 European Agenda on Migration and confirmed in the Political Guidelines 2019-2024,¹ with migration issues cross-cutting portfolios on international development, humanitarian affairs, diplomacy and security.

With a global approach in mind, this section of the Atlas of Migration provides a window onto migration and a broad range of inter-related topics for 170 countries and territories around the world. It includes data on the scale and type of migration to and from each country/territory, some of the drivers of migration including demographic change and development indicators, and an insight into some of the implications of migration for economies and societies, such as the scale of remittances and urbanisation. The country/territory profiles are organised by geographical continent, defined in accordance with Eurostat guidelines. This enables a visual representation of the close migratory

links between countries and territories within the same geographical area, as migration patterns are often local or regional in scope. Each continent is assigned an individual colour and the profiles contained within are placed in alphabetical order to allow the reader easy access. An additional profile shows aggregated data for the World and is included as a pull-out sheet. 'How to Read' and 'Technical Notes', respectively at the beginning and at the end of the section, explain the single charts and provide notes and references to the original data sources.

There are varying dynamics and migratory processes in different regions and countries. Whereas international migrants represent 21% of the population of Oceania and 16% in North America, in Africa it is only 2%. Yet as development advances in Africa, and the continents' large youth population enters adulthood with greater resources, higher education levels and more connectivity than previous generations, we can expect migration within and from Africa to grow. In 2018, 71% of the world's 25.9 million refugees come from just five countries and territories (Syria, Palestine, Afghanistan, South Sudan and Myanmar),² and almost half (49%) of the 41.3 million people internally displaced within their countries were in just five countries (Syria, Colombia, Democratic Republic of Congo, Somalia and Afghanistan).³

In the future, migration will continue to shape, and be shaped by, demographic, economic and geopolitical developments around the world. This will take different forms and have varying implications from place to place. The country/territory profiles that follow provide more detailed insights into these developments and different migration patterns.

1 Von der Leyen, Ursula, *A Union that strives for more. My agenda for Europe* (2019, European Commission, available online at https://ec.europa.eu/commission/sites/beta-political/files/political-guidelines-next-commission_en.pdf)

2 Data on Palestine refugees under the mandate of UNRWA has been aggregated to UNHCR refugees data

3 IDMC, *Global Report on Internal Displacement 2019* (Geneva, 2019, available online at <http://www.internal-displacement.org/global-report/grid2019>)

This section covers 170 non-EU countries and territories grouped by geographical continent according to Eurostat guidelines. This organisation is based on geographical criteria only and does not have any political implications. More detailed information is available in the Technical Notes at the end of this section. For each country/territory, the charts are organised in thematic parts. Maps and flags are for illustrative purposes only.

The data refers to 2018. If the data for 2018 is not available from the original source, the corresponding field is either missing or indicated as 'N/A'. Whenever 2018 data is not available for an entire thematic part, the latest available values are provided.

Note that in some cases, the sum of percentages or of individual values might not add up to 100 or to the total value. This is due to rounding and confidence intervals.

MIGRATION [in thousand] (UNDESA)

Migration to (Imm) and from (Emi) the country/territory

The chart is relative to migrant population estimates (stock) at mid-year. The 'Imm' bars show the total number of people residing in the country/territory who have immigrated from the EU ('EU') or from somewhere else in the world ('other'). The 'Emi' bars show the total number of people from the country/territory who have emigrated to the EU ('EU') or to somewhere else in the world ('other').

UNDESA estimates on migration stocks are available every 5 years, with a two-year revision starting from 2017.

ASYLUM IN EU [1st instance] (Eurostat)

First time applications

The chart shows the number of citizens from the country/territory who have made a first application for asylum in an EU MS per year. The data covers multiple years and is broken down by sex. The total number of annual applications is at the bottom of the chart.

First instance decisions

The chart shows the decisions made by EU MS on asylum applications by nationals of the country/territory. Outcomes are one of the following:

- 'Geneva' for 'Geneva convention status';
- 'Subsid.' for 'Subsidiary protection';
- 'Human.' for 'Humanitarian protection';
- and 'Reject.' for 'Rejected application'.

The total number of annual decisions is on the right of the chart.

IRREGULAR MIGRATION IN EU (Eurostat)

Persons found to be illegally present

The chart shows the annual number of people from the country/territory who have been determined by EU MS authorities to be 'illegally present' under their national laws relating to immigration. Note that the definition of 'illegally' may vary across MSs and only people who are apprehended or otherwise come to the attention of immigration authorities are counted. People who are 'illegally present' might have entered the country/territory legally.

Persons ordered to leave, persons returned and return rate

The bar chart shows the annual number of people from the country/territory who have been 'Ordered to leave' the MS and those who have physically 'Returned' to their country/territory of origin or another third country. From this data a 'Return rate' has been calculated. This is the ratio between the number of people physically returned and the people ordered to leave. Since it is calculated on annual data, it might result higher than 100%, because of administrative backlogs.

DEMOGRAPHY [in thousand] (UNDESA)

Population - 2018

The figure on the top shows the total population estimates (in thousands) in the medium fertility variant scenarios.

The pyramid shows the demographic composition of the population in the country/territory. It indicates the estimated number of people (in thousands) by age group and sex (males and females) in 2018. The original UNDESA estimates are organised in 5-year cohorts and have been aggregated to obtain 10-year cohorts.

The figure on the bottom shows the population change (%) between 2018 and 2030 according to the medium fertility variant scenario.

REFUGEES AND IDPs (UNHCR, UNRWA, IDMC)

Refugees from/within the country/territory & IDPs - 2018

The chart shows the number of people at the end of the reference year for the following groups:

- refugees and people in refugee-like situations from the country/territory residing in an EU MS ('EU') or in countries and territories other than that of birth and outside the EU ('other');
- refugees and people in refugee-like situations in the country/territory;
- Internally Displaced People (IDPs) due to armed conflict, generalized violence or human rights violations in the country/territory. Data on refugees and people in refugee-like situations is from UNHCR and UNRWA. Data on IDPs is from IDMC. Data on the total number of people who have been displaced by natural disasters is not readily available.

Note: the data on migration and refugees comes from different sources. Due to methodological differences, they are not directly comparable.

RESIDENCE PERMITS IN EU (Eurostat)

First residence permits issued during the year

The top chart shows the number of people from the country/territory who have received a first residence permit in an EU MS each year, during the last four years. The reasons for issuing permits are 'Work', 'Family', 'Education' or 'Other' (which includes all forms of National and International Protection. Further details in Technical Notes).

Valid resident permits at the end of the year

The bottom chart shows the number of migrants from the country/territory residing in the EU at the end of the year and the different types of residence permits that they hold. It also shows the number of people with permits that are valid for at least five years (national and EU long term residence permits). This signals the total number of permits held by people in the country/territory at the end of the year (the migrant stock).

NATURALISATION IN EU (Eurostat)

Citizens who have acquired citizenship in EU

The bar chart shows the acquisition of citizenship over each of the last four years by people who are nationals of this country/territory and have moved to an EU MS.

INTERNATIONAL AGREEMENTS

This section shows whether the country/territory is a State Party to (by accession, ratification or succession) or has preliminary endorsed (by signature) key international agreements and bilateral agreements with the EU. This gives an overview of international and bilateral frameworks governing different forms of migration in the country/territory. For a definition of each agreement, see the Technical Notes.

REMITTANCES (World Bank)

Inflows [USD millions (as % of GDP)]

The chart gives an indication of economic ties between emigrants and communities in the country/territory of origin. It shows the amount of money that is sent to the country/territory (inflows) through personal transfers from the EU ('from EU') and from the rest of the world ('other'). The amount of remittances is expressed in millions of USD (and as percentage of the GDP).

FINANCIAL ASSISTANCE FROM EU (UNOCHA, OECD)

ODA and Humanitarian aid [USD millions (as % of GDP)]

The bars show the scale of economic transfers to the country/territory to address humanitarian needs and support development. The chart presents aggregated data on humanitarian aid and official development assistance (ODA) sent to the country/territory from EU institutions during the reference year.

The amounts cover all sectors and include only paid contributions. It is expressed in millions of USD (and as percentage of the GDP).

DEVELOPMENT INDICATORS (World Bank, United Nations Development Programme, Vision of Humanity)

Eight indicators in this part give an overview of the political, social, economic and environmental context in the selected country/territory. They provide a first view of factors relating to the country/territory's development which may have an influence on drivers and dynamics of internal and international migration. The number at the top shows the latest available data for this country/territory and the year it refers to. The line shows the trend over time for the annual value of the indicator since 2000.

Global Peace Index shows the relative peacefulness of states and territories around the world according to multiple variables (for more information see Technical Notes). The values range from 1.11 (most peaceful) to 3.81 (least peaceful).

Political stability shows a score of how people in a country/territory perceive the potential for political instability, violence or terrorism there, between 0 (least stable) and 100 (most stable).

Human Development Index shows the score of a country/territory according to its socio-economic development (health, education and general standard of living) ranging from 0 (lowest development) to 1 (highest development).

Under 5 mortality rate shows an estimate of how many of the children born in this year are likely to die before reaching five years old.

GDP per capita (PPP) is an indicator of economic standing, showing a country/territory's economic output (in USD) per inhabitant.

Below international poverty line shows the proportion of the country/territory's population which lives on less than USD 1.90 per day.

Urban pop. shows the proportion of the country/territory's population which resides in urban areas.

Agriculture land use shows how much of the land in this country/territory is used for agricultural production.

RISK ASSESSMENT FOR HUMANITARIAN CRISES AND DISASTERS (JRC)

Risk Index based on INFORM methodology, together with its main components

The charts show a range of indicators from the JRC Risk Index on humanitarian crises and disasters based on INFORM methodology. This collates multiple data sources to give a single score ranging from 0 (lower risk) to 10 (higher risk). It describes the context in the country/territory, giving an overview of factors which may have an influence on dynamics of internal and international migration in and from the country/territory.

The first six indicators are the components of the composite indicator on the right. Each graph shows the variation of the indicator from 2011; the number displayed indicates the latest available value. The indicators are defined in the Technical Notes.

The image shows the interior of a bus, looking towards the front. Rows of dark-colored seats are visible, with some passengers' heads seen from behind. The front window shows a bright, hazy outdoor scene, possibly a highway or road. The ceiling has air vents and overhead lighting. A blue semi-transparent box is overlaid on the right side of the image, containing the title text.

An aerial, top-down photograph of a large, diverse group of people walking across a dark asphalt street. The street is marked with several wide, white, parallel stripes that create a crosswalk pattern. The people are of various ages, ethnicities, and are dressed in casual summer clothing. Some are carrying bags, backpacks, or strollers. The overall scene conveys a sense of movement and a multicultural gathering.

TECHNICAL NOTES

DEMOGRAPHY

Indicator: Total population , demographic pyramid and population change

Source of data: UNDESA WPP Standard Projections, CSV file, Population – medium variant, annual, from 1950 to 2100 (total, female, male)

Description: Total population is based on the de facto definition of population in a country/territory, area or region as of 1 July of the year indicated. It comprises total population, as well as female and male population, and it is presented in thousands. The population change between the reference year and 2030 is calculated by KCMD on projections in the “Medium Fertility Variant” scenario.

Note: Data on Kosovo are included in Serbia. This is without prejudice to positions on status and reflects data in the original source. Data on China do not include Hong Kong and Macao, that are presented separately by the source.

Date of consultation: 04/12/2019 (last update 28/08/2019)

MIGRATION

Indicators: Emigrants and Migration

Source of data: UNDESA – POP/DB/MIG/Stock/Rev.2019 – Total Intern. Migrants Stock by Origin and Destination

Description: International migrant stock at mid-year (both sexes) by origin and by major area, region, country/territory or area of destination.

Note: In principle, refugees (under UNHCR and, when relevant, UNRWA) are included in the number of migrants. However, it should be noted that inconsistencies might arise when comparing the number of migrants reported by UNDESA with the number of refugees reported by UNHCR or by UNRWA. This is mostly due to differences (definitions, reference period and methodologies) in data collections. For further information on UNDESA methodology for estimating the migrant stock, see the documentation available at the following link:

<https://www.un.org/en/development/desa/population/migration/data/estimates2/estimates19.asp> .

UNDESA data on Kosovo are included in Serbia. This is without prejudice to positions on status and reflects data in the original source. Data on China do not include Hong Kong and Macao, that are presented separately by the source.

REFUGEES AND IDPS

Data on Palestine refugees under the mandate of UNRWA has been added to UNHCR data. UNRWA operates in Palestine, Lebanon, Syria, and Jordan.

Indicator: Refugees

Source of data: UNHCR - unhcr_popstats_export_persons_of_concern_all_data

Description: Refugees and people in ‘refugee-like situations’ by origin, end of the year.

Note: According to UNHCR: “Refugees include individuals recognised under the 1951 Convention relating to the Status of Refugees; its 1967 Protocol; the 1969 OAU Convention Governing the Specific Aspects of Refugee Problems in Africa; those recognised in accordance with the UNHCR Statute; individuals granted complementary forms of protection; or those enjoying temporary protection. Since 2007, the refugee population also includes people in a refugee-like situation” (<http://popstats.unhcr.org/en/overview>). According to the UNHCR glossary: “The category of people in a refugee-like situation is descriptive in nature and includes groups of people who are outside their country of origin and who face protection risks similar to those of refugees, but for whom refugee status has, for practical or other reasons, not been ascertained.” (<http://reporting.unhcr.org/glossary/r>). Data on China do not include Hong Kong and Macao that are presented separately by the source.

ASYLUM IN EU (1ST INSTANCE)

Indicator: First time applications

Source of data: EUROSTAT - migr_asyappctza

Description: First-time asylum applications by citizenship, age and sex. Annual aggregated data (rounded).

Note: First time asylum applicants are people who lodged an application for asylum for the first time in a given Member State during the reference period. The term 'first-time' implies no time limitation and therefore people can be recorded as first-time applicant only if they have never applied for international protection in the reporting country/territory in the past, irrespective of whether they have applied in another Member State of the EU.

Date of consultation: 04/12/2019 (last update 03/12/2019)

Indicator: First instance decisions by outcome

Source of data: EUROSTAT - migr_asydcfstz

Description: First instance decisions on applications by citizenship, age and sex. Annual aggregated data (rounded).

Note: First instance decision means a decision granted by the respective authority acting as a first instance of the administrative asylum procedure in the receiving country.

Link: http://appsso.eurostat.ec.europa.eu/nui/show.do?dataset=migr_asydcfstz&lang=en

RESIDENCE PERMITS IN EU

Indicator: First residence permits

Source of data: EUROSTAT - migr_resfirst

Description: First permits by reason, length of validity and citizenship.

Note: Any authorisation issued to a person for the first time by the authorities of a Member State allowing a third country national to stay legally on its territory. The dataset is disaggregated by the following groups of reasons: Remunerated activities (referred to as 'Work'), Family, Education and Other. The group 'Other' includes Refugee status and subsidiary protection; Humanitarian reasons; Residence only; Unaccompanied minors; Victims of trafficking in human beings; and Other reasons not specified. For further information, the reader can refer to the specific dataset from EUROSTAT (migr-resoth: 'First permits issued for other reasons by reason, length of validity and citizenship').

Link: : http://appsso.eurostat.ec.europa.eu/nui/show.do?dataset=migr_resfirst&lang=en

Date of consultation: 04/12/2019 (last update 28/10/2019)

Indicator: Valid permits (stock) – Valid permits at the end of the year (by reason)

Source of data: EUROSTAT - migr_resvalid

Description: All valid permits by reason, length of validity and citizenship on 31 December of each year.

Note: The dataset includes the same four groups of reasons as the First residence permits dataset, as well as two additional groups: Refugee status and Subsidiary protection. For consistency in the data presentation, these two have been aggregated into the group 'Other'.

Link: http://appsso.eurostat.ec.europa.eu/nui/show.do?dataset=migr_resvalid&lang=en

Date of consultation: 04/12/2019 (last update 10/10/2019)

Indicator: Valid permits (stock) – Valid long-term permits at the end of the year

Source of data: EUROSTAT - migr_reslong

Description: Long-term residents by citizenship on 31 December of each year.

FINANCIAL ASSISTANCE FROM EU

The financial assistance from EU is calculated as the sum of disbursed ODA and Humanitarian aid for the country/territory during the year. The percentage of GDP is calculated using World Bank data.

Indicator: Official Development Assistance (ODA)

Source of data: OECD - Creditor Reporting System (CRS)

Description: The values are relative to the total (all types) ODA from EU institutions, through all channels. They represent gross disbursements and are relative to the current prices.

GENERAL NOTES

- **Maps** are for illustrative purposes only and do not imply any political positions on borders and disputed territories.
- The **grouping of non-EU countries and territories by continent** is based on geographical criteria only and does not have any political implications. For this exercise, we have followed the ESTAT GEO (Geopolitical entities reporting) code list which provides geographical entities for statistical purposes at the aggregate-level of countries, regions and organisations.
- The designation of '**Palestine**' shall not be construed as recognition of a State of Palestine and is without prejudice to the individual positions of the Member States on this issue.
- The designation of '**Kosovo**' is without prejudice to positions on status, and is in line with UNSCR 1244/1999 and the ICJ Opinion on the Kosovo declaration of independence.
- UNDESA, UNHCR and Eurostat provide separate data on **Morocco** and the "**non-self-governing territory of Western Sahara**". As the EU does not officially recognise the "non-self-governing territory of Western Sahara", the relative profile is not included in this Atlas.
- Differently from all the other sources, UN provides separate data for most of the **dependent territories** (such as overseas territories or departments, unincorporated territories, etc.). UNDESA or UNHCR data relative to these dependent territories are not included in the country on which they depend.

KNOWLEDGE CENTRE ON MIGRATION AND DEMOGRAPHY (KCMD)

The European Commission's Knowledge Centre on Migration and Demography (KCMD) was established in June 2016 to provide scientific evidence for EU policymaking in migration and demography related fields. In addition to supporting the European Agenda on Migration, the focus is on migration and demographic developments at global scale and their societal impact on the EU in the medium to longer term.
